The Headless Chicken's Lost Treasure

Once upon a time, on an isolated farm, there lived a chicken family. On June 7, 2015, one of them, a clever chicken, made a bold decision. After months of hard work gathering seeds, he used his savings to buy 10 bitcoins. At the time, no one saw the value in it, but this chicken knew that one day these bitcoins would represent a priceless treasure, capable of saving his family from their miserable life on the farm.

However, his sharp business sense attracted the attention of thieves. A mysterious group of chickens attempted to steal this treasure from him. But the clever chicken had everything planned. Before the thieves could act, he hid his bitcoins in an ultra-secure ledger, concealing the secret phrase needed to access them behind a series of riddles. In front of his helpless family, the thieves captured him, but despite the pressure, he never gave in. Instead, he challenged them: "Solve the riddles, and you'll find the key."

Enraged, the thieves cut off his head and locked it inside the Ledger, to punish him and ensuring that no one else would discover the existence of the riddles.

Since then, the chicken's head remains imprisoned, guarding the secret of the bitcoins, and gave birth to the legend of the "Headless Chicken" in the chicken world. His devastated family carefully kept the ledger that held their son's fate.

What the thieves didn't know was that the "Headless Chicken" had taken additional precautions: he had entrusted the riddles to his family, with each member holding 8 of the 24 riddles needed to find the key. A crucial detail that the thieves never discovered.

Recently, Chicken Daddy, the father of the Headless Chicken, appeared online, pleading for help. For years, the family tried in vain to solve the riddles and free their son's head. Desperate, they are now willing to offer the contents of the ledger to anyone who can help solve the mystery.

The secret phrase, scattered across a series of complex riddles, awaits discovery. But beware, the riddles are numerous, and each clue brings you one step closer to the hidden treasure. Whether or not you know about bitcoin, everyone can participate. Together, we can unlock the mystery of the Headless Chicken.

Let's embark on this adventure together !

Introduction

This document's goal is to allow you to better understand how works the Headless Chicken Ecosystem.

Of course, we are a young project, so everything is under construction and will be loaded step by step.

To be well understood, Headless Chicken is a basic meme coin. We wanted to create a universe with a new branding, the Headless Chicken world.

(We know the fact that if chickens had a conscious mind and could think for themselves, they will destroy us cause there are 23 billions in our earth against only 8 billions humans. They have big and sharp claws.

So we'd rather have them on our side if they develop a conscience one day).

No ok, out of joke, we didn't wanted to create a simple meme coin. We're really passionate about the blockchain and cryptocurrencies world and we want to participate in this world development (while helping the family find their son's head). We really wanted to develop a strong ecosystem step by step. So basically, set up the ecosystem and then develop it gradually with feedbacks from our community.

**LET'S ENJOY
THE GAME !**

Headless Chicken's Ecosystem Description

This is our principal token : the HLC Token corresponding to the Headless Chicken's head.

The one you have in your wallet or plan to have.

It's the basic of our ecosystem, this is the token that makes you eligible for the various quests and objectives you need to complete to obtain the **Golden HLC**.

This is our poor Headless Chicken son.

He is our project mascot. He'll be sad until the day someone finds his head.

Let's support him until the big winner find his head.

....

How quests work ?

1/2

All the quests to find the chicken head will be easily accessible, so even those who've never touched cryptocurrencies before will be able to access them. So it'll be nothing like the quests available in most of the airdrops we know. By the way, it's not an airdrop. Everyone on this planet will be equal, everyone will have the same opportunities to win. Of course, you'll have to think on your feet and use the tools and clues at your disposal.

All the quests and clues will be announced on our discord, Youtube and will also be posted on our X and Telegram social networks.

1 Quest = 1 image, that's it

You have to know how to use Discord, Twitter, Telegram & Youtube, of course. But some different tutorial will be launched on our Youtube Channel to help you understand how every aspect of the ecosystem works.

Everything will be very easy, you will see.

To access the secret contained in the Ledger key, you'll need to solve the 25 riddles (24 words + their order).

These riddles will take you on a journey through many different areas and require no knowledge of the cryptocurrency ecosystem.

The riddles will all be independent of each other (the answers to the previous ones will not be necessary to solve the following ones).

There will be one riddle per week, for 6 months.
They will take the form of an picture relating a moment in the life of our favourite chicken family.

You won't be able to check your answers until all the riddles have been published.

Be inventive, logical, careful and allow yourself to dream !

How quests work ?

2/2

So be patient and hold your HLC token. It will be easily for you to find the treasure and solve the quests.

A website will be available at the end of the treasure hunt to try your 24 words combination, but be careful, you can each try only 1 time a day.

DISCLAIMER :

Because

Some of you will probably try to find directly the quests's answer without thinking about solving the problems. Useless. You have 115 792 089 237 316 195 423 570 985 008 687 907 853 269 984 665 640 564 039 457 584 007 913 129 639 936 differents possibility (or 2^{256} , as you wish).

Good luck !

Every month during the quests, the supply allocated to the community reward will allows some of the most active members to win some additionnal giveaways.

- ➔ The most beautiful fanart will be rewarded each month. The community will choose for the one they prefer.
- ➔ The most active member will be rewarded each month. The moderator on our Discord will choose the member they saw being most active.
- ➔ The person who shares our project the most will also be rewarded.

The Headless Chicken's Ecosystem

(Technological Roadmap)

Our objectives are simple. Take part in the development of the cryptocurrency ecosystem over the long term and create a strong chicken community to fight against bears !

Date	What will happen ?
December 2024	Starting speaking about the project on social media and launching the ecosystem step by step.
February 2025	Listing of the token.
June 2025	Starting the community quests.
Someday in the future	The finder of the Headless Chicken's head will win everything we plan to offer to the 1st winner
After ?	New Quests ? New Project ? The community will help us decide.
After ?	Become the leading decentralized lottery in the digital world, why not ? And keep on making you win bigger and bigger prizes.

The Headless Chicken's Ecosystem

(Quests Roadmap)

The date we will reach 10,000 members on our discord = T

Date	What will happen ?
T	1st Quest Launch
T + 1 week	2nd Quest Launch
<p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p>	<p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p> <p>• • • • • • • • • •</p>
T + 23 weeks	24th Quest Launch
T + 24 weeks	Word Order Quest Launch

Reward & distribution Mechanisms

All the quests will be Launch first on our Discord Channel.
(And that's where all the extra rewards will be distributed)
Join us so you don't miss anything !

BUT good to know that some important clues will be hidden and launch on our other social networks.

Follow us everywhere so you don't miss nothing.

Good to know : Rewards will be distributed throughout the adventure to reward the most active players for their quests and puzzles.

What about the big Winner ?

1/2

Imagine, one second...

You find the head of our poor Headless Chicken. All the chickens will feel indebted to you.

You deserve a little reward..

- 1 - 10 % of the total Headless Chicken's token supply**
- 2 - Special and unique role in our Discord**
- 3 - The head coin in NFT (let's see what the community makes of it)**
- 4 - 1 Ledger Key**
- 5 - The first place in our Wall of Fame**

11.

What about the big Winner ?

2/2

**It will be an evolving kitty...
A little more explanation.**

For the remaining 10% of the total supply (which will be blocked on the Ledger Key for the winner), this amount will be variable.

It will obviously depend on the total market cap of the headless chicken token. If the community exchanges the token, if its activity remains exponential over time, this amount could be really significant.

Example : if the marketcap is \$10,000,000, the 10% corresponds to \$1,000,000.

If we reach the market cap of another very famous meme coins, such as the \$PEPE, market cap around \$3.80 B, the 10% now corresponds to \$380,000,000.

Interesting, isn't it ?

Everything will depends on the community's commitment to the project.

The Future of Headless Chicken

We have lots of ideas to implement, step by step. We want to continue to focus on giving money to our community. That's why we will continue to reward you throughout the 6-month treasure hunt.

Thereafter, we would like to continue to do treasure hunts, improve our support and strengthen our community by actively participating in the development of our ecosystem.

We would also like to develop the usefulness of our token in the ecosystem, set up a decentralized lottery system where you could buy coupons with your \$HLC and participate in a giant raffle allowing you to win big, several times a month.

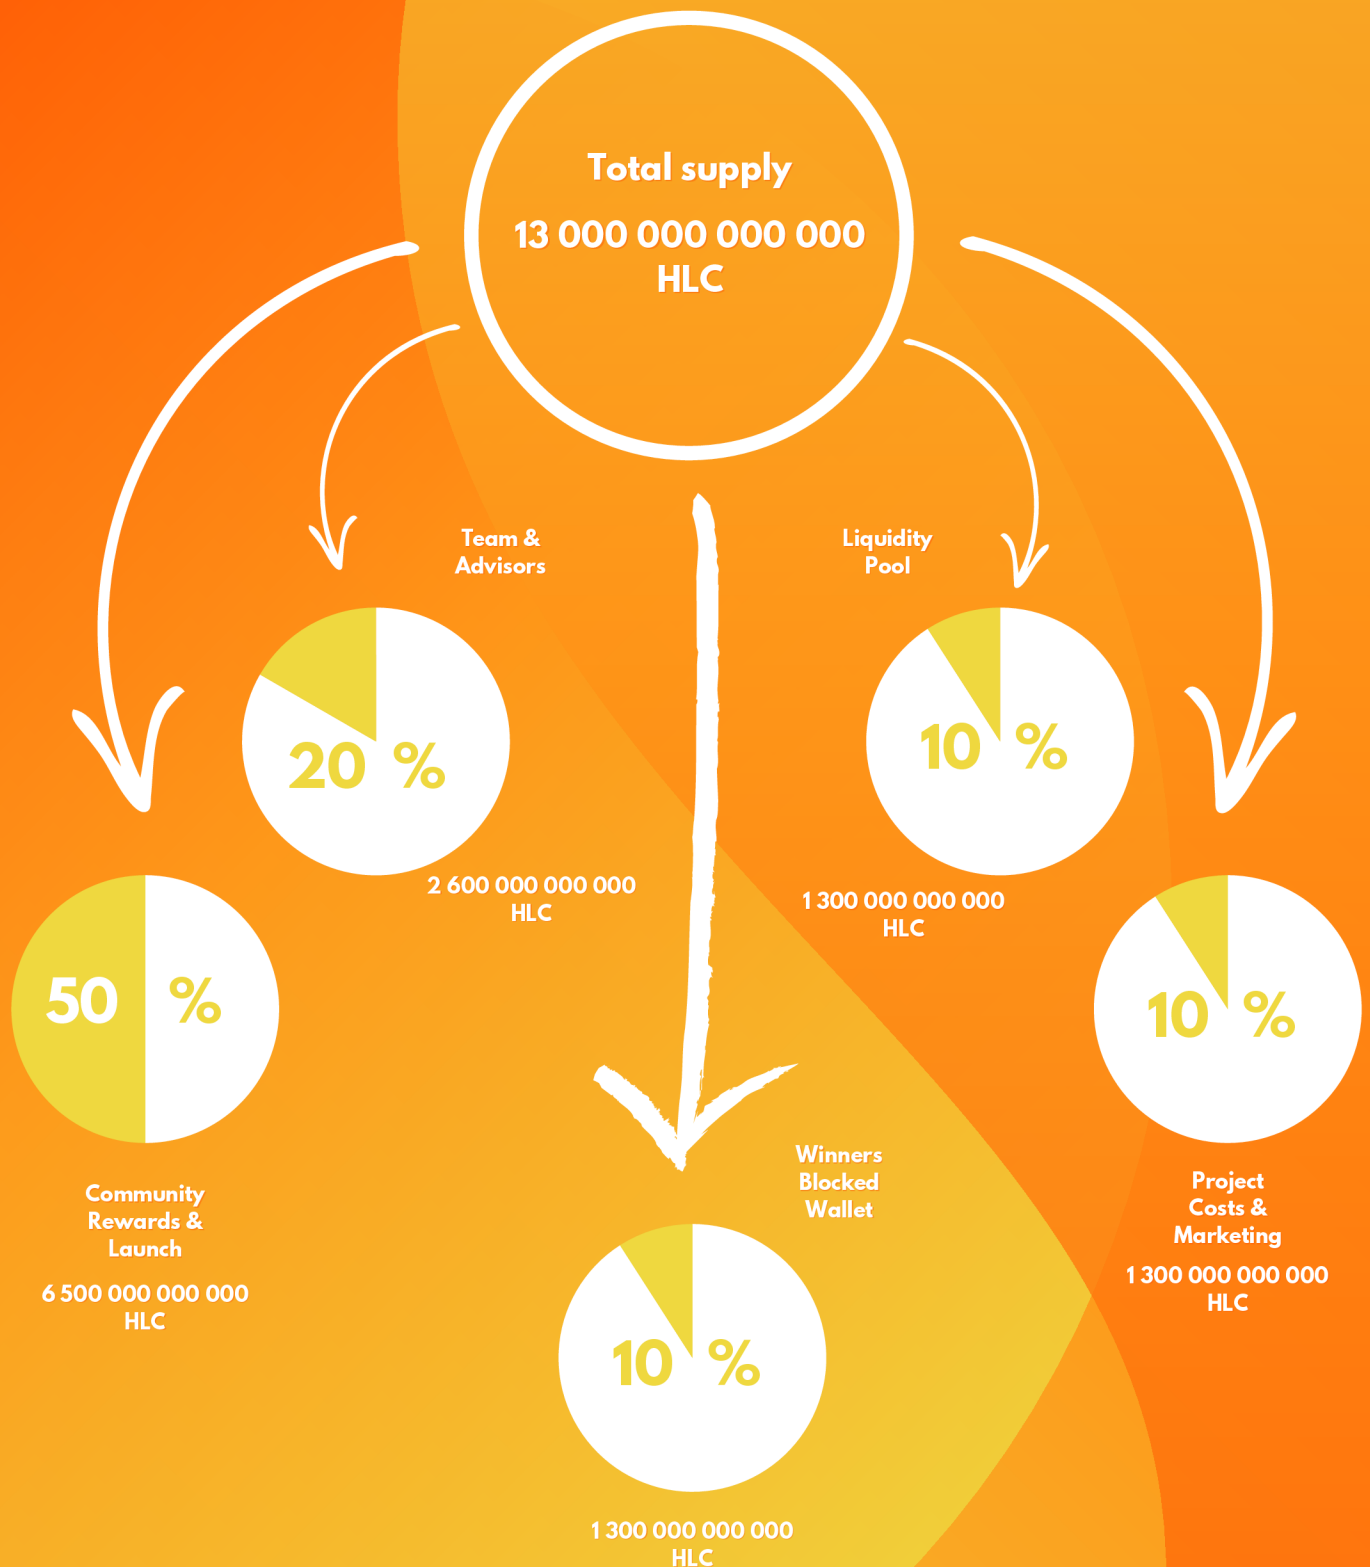

Let's see what the community will do with this project !

Let's make this chicken family the most popular chicken in the world !

Our Tokenomics

MORE DETAILS COMING SOON

Conclusion

The idea for this project came from one of my dreams: a man, a little crazy, who has never really liked the classic career paths discreetly imposed by our societies, who doesn't like the established social codes and who tries as best he can to have fun in this difficult and merciless world, to the detriment of a more or less classic career path.

So what does a treasure hunt have to do with blockchain? The choice of blockchain was an obvious one for me, allowing me to decentralize my treasure hunt and, above all, make it free and accessible to all, a great dreamer with a passion for treasure, the revolutionary technology of blockchain and much more besides (you'll see this in the riddles).

With this project, I hope to contribute to the emancipation of this technology, help it to be heard and accepted, and above all accelerate the inevitable..and yes, the people always win!

Even people who don't necessarily have the possibility or the means to interact with this world can enter my universe, and that's my only goal.

Thank you to my team, who believed in me, for helping me create this ecosystem. Thank you to myself for allowing me to dream in this pressurized world, yes. (Should I put piano music on this page to heighten the emotion? Probably... I'll think about it for V2).

We have no funding, no partners, we've created all this for fun and to help someone deserving get rich, and now the project is in your hands !

We had a lot of fun creating this ecosystem, with no particular expectations, just "what if" or "imagine". For a few months, we were able to get away from this horrible world, with its wars, inequalities and misunderstandings.

And really, why not contribute to making this ecosystem perennial and more accessible? On our scale, of course.

Finally, this project is about us, our beliefs, our doubts, our fears and our passions.

And yes, we don't intend to rival SHIBA or PEPE with this project, but who knows, after all? It all depends on you and the success you give this project!

Daddy Chicken
